SEASON
1926

Retail List Gladioli 1926

D. H. UPJOHN

SALEM, OREGON

Orders for \$1.00 or over sent postpaid. Cash with order. All stock offered, and orders accepted, subject to prior sale. Bulbs listed in this list from 1 1/4 inches up, unless otherwise specified, that being size to give full blooming spike. Half sized bulbs for half price, quarter sized bulbs for one-fourth price.

We sell six bulbs of one variety from this list at dozen rate; three 10 cent bulbs of one variety for 25 cents. Ten Orange Glory bulbs or bulbs of equal value, our selection, given free with retail orders of \$5.00 or over.

We suggest you order early. We will hold bulbs until March 15 on a 25 per cent deposit.

If interested in large bulbs in more than 25 of a variety; in planting stock, or bulblets, ask for our wholesale list. A postal brings it to you.

Many times, people not familiar with names of varieties, send us a check to cover assortments of our selection. We are glad to make these up. Tell us about number of bulbs you wish, and colors, and we will do our best to please you.

Youell's Favorite (K), striking rosy lavender, finely ruffled.....	15	1.50

WHAT SOME OF OUR CUSTOMERS SAY

(Space precludes publication of numerous similar letters)

John B. Sinclair, Victoria, B. C., Canada: "Let me say that I have nothing but praise for the results from the 'glad' bulbs I had from you. I grew them alongside a lot of importations from Holland and the resultant comparison means 'no more Dutch bulbs for me.' Purple Glory went over six feet with immense blooms, although my soil is far from being the best."

F. D. Kinnear, Long Beach, California: "Yours are the finest bulbs I ever grew and the largest. I have a nice garden of glads every summer and am a member of the American Gladiolus Society."

Rev. H. Ralph Geil, Brownsville, Oregon: "Wish to thank you for liberal supply of extras. The quality of your bulbs is such that I am enclosing another order which I had expected to send elsewhere."

Mr. D. E. Peddie, Winnipeg, Canada: "The glads I got from you did so well this summer I thought I should tell you. They were all true to name; they everyone grew and made strong plants and exceptionally fine bloom spikes and took prizes wherever exhibited . . . I wish to compliment you on your packing of the bulbs. You certainly do not spare labor or expense to deliver your goods in good condition."

SOME SUGGESTIONS

We cannot recommend too highly to flower lovers "The Flower Grower," printed at Calcium, New York, and edited by Mr. Madison Cooper. Subscription price \$2.00 per year; three years for \$4.50, five years for \$6.00. It is the ideal flower magazine for gladiolus growers or flower raisers in general. This mention is gratuitous, as we know that anyone not now a subscriber will reap great enjoyment and profit from this splendidly edited magazine.

All growers of gladioli should join the American Gladiolus Society. Send \$2 for your dues to John C. Davis, secretary, 77 South Avenue, Rochester, N.Y. This organization is doing a great work for the world's favorite flower.

Better Flowers—This is a high class little floral magazine published at Portland, Oregon, under auspices of the Portland Rose Society. Subscriptions \$1 a year. Send subscriptions either to my address or Editorial Office, 338 Chamber of Commerce Bldg., Portland, Oregon.

If you are interested in wild flowers, we suggest you write to Miss Ella McMunn, Route 8, Salem, Oregon. She gathers seeds of Oregon wild flowers, trees and shrubs which she puts up in packets at \$1 each. She is able to take orders for seeds of many rare and splendid specimens of Oregon flora which will add charm to your plantings and pleasure to your garden work. Miss McMunn is doing a great work in aiding to preserve our wonderful wild flowers and your support will materially assist her.

SOME CULTURAL SUGGESTIONS

Planting Bulbs—Any time ground is in good condition in spring plant large bulbs about four inches deep, and not less than four inches apart. Smaller bulbs plant a little shallower. Don't let manure come in contact with bulbs. Sunny position is best.

Cultivation—Keep well cultivated and well watered. Water deeply when watering and not so often. Cultivate frequently, if possible, for best results.

Digging—Dig in fall, preferably late September or October. It is best to dig before tops are killed by frost. Cut off tops close to bulb as soon as dug. Let bulbs cure in sun, keeping away from frost. Store in cool, dry place, away from heat, frost and moisture. Keep in shallow boxes, if possible, and stir occasionally to give air.

Cutting Blooms—Leave at least four leaves on plant in cutting. Cut when first bloom opens and spike will bloom to tip. Keep water fresh and every day or two cut off quarter of inch of stem. When cutting, cut stem with slanting slice.

SURPRISE SPECIAL

Just before planting time in the spring we often have bulbs in various varieties in excess of planting requirements. Send \$1 with your order, or any multiple of \$1, and we will send you bulbs, bulblets or planting stock very much in excess of amount you send. These must be our selection only. When ordering ask for "Surprise Special."
